

User Manual

This manual explains how to operate the website and receive leads.

1. Viewing leads

- Contact inquiries are emailed to the address set in `CONTACT_TO_EMAIL`.
- Newsletter signups are sent to Mailchimp list set by `MAILCHIMP_LIST_ID`.
- If HubSpot or Zoho is configured with `HUBSPOT_API_KEY` or `ZOHO_ACCESS_TOKEN`, new contact leads are forwarded to CRM automatically.

2. Managing content

- Services are stored in `src/data/service-details.ts` — edit this file to update services.

3. Deployment

- Push to GitHub and enable automatic deployment with Vercel.
- Add environment variables in Vercel project settings.
